

**METHOD AND APPARATUS FOR SELECTIVELY COPYING DOCUMENTS
WITH HANDWRITTEN NOTATIONS**

ABSTRACT

5 A document and image management system that can manage
handwritten comments and/or edits on conventional paper. The invention
may be embodied as an enhanced photocopier adapted to locate and
classify handwritten notations using optical character recognition techniques.
This embodiment allows the user to select options to selectively copy only
those pages with notations, to create an index of handwritten notations, to
10 add side margin locator marks to the document, and to compare subsequent
comments on different drafts.
